TRENDS IN BIOCHEMICAL SCIENCES – REFERENCE EDITION
Published by the International Union of Biochemistry and Elsevier Publications Cambridge

The reference edition of **Trends in Biochemical Sciences** is a compilation of the articles which appear in the regular monthly magazine edition. For citation purposes, readers are asked to note that the page numbers of reprinted articles are common to both editions.

Editorial policy

Articles will normally be invited, but proposals for reviews may be submitted to the Editor-in-Chief or to a member of the editorial board. Such a proposal should, in the first instance, consist of a brief statement of the scope of the review, plus the key references.

Editor-in-Chief

R. A. Bradshaw, Department of Biological Chemistry, California College of Medicine, University of California, Irvine, CA 92717, USA.

Editor

M. E. Purton, Elsevier Publications Cambridge, 68 Hills Road, Cambridge CB2 1LA, UK.

Editorial Staff

S. Best, S. Hirst and C. Speed.

Production and Design

Vicki Rushworth.

Editorial Board

R. Arnon, Department of Chemical Immunology, The Weizmann Institute of Science, Rehovot 76 100, Israel.
A. R. Fersht, Department of Chemistry, Imperial College of Science and Technology, London SW7 2AY, UK.
C. Guthrie, University of California, San Francisco, School of Medicine, Department of Biochemistry and Biophysics, San Francisco, CA 94143-0448, USA.
R. W. Hanson, Department of Biochemistry, Case Western Reserve University School of Medicine, 2119 Abington Road, Cleveland, OH 44106, USA.
T. Hunt, Department of Biochemistry, University of Cambridge, Tennis Court Road, Cambridge CB2 1QT, UK.
D. I. Meyer, Department of Biological Chemistry, UCLA School of Medicine, Los Angeles, CA 90024, USA.
Y. Nishizuka, Department of Biochemistry, Kobe University School of Medicine, Kobe 650, Japan.
P. Schimmel, Department of Biology, Massachusetts Institute of Technology, 77 Massachusetts Avenue, Cambridge, MA 02139, USA.
A. Trebst, Lehrstuhl für Biochemie der Pflanzen, Ruhr-Universität Bochum, Universitätsstrasse 150, 4630 Bochum 1, FRG.
P. H. von Hippel, University of Oregon, Institute of Molecular Biology, Eugene, OR 97403-1229, USA.

Trends in Biochemical Sciences is apolitical. The views and opinions expressed by its writers and correspondents do not necessarily reflect those of the editorial board or the publishers. No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

Subscription offices

In the USA and Canada: Elsevier Science Publishing Co. Inc., Journal Information Center, 52 Vanderbilt Avenue, New York, NY 10117, USA.
In the United Kingdom: Elsevier Publications Cambridge, 68 Hills Road, Cambridge CB2 1LA, UK.
In all other countries: Elsevier Science Publishers B.V. (Biomedical Division), P.O. Box 548, 1000 AM Amsterdam, The Netherlands.

CONTENTS

JANUARY

page

Journal Club
Egg activation unscrambles a potential role for IP_4, *by Miles D. Houslay* 1

Features
Textbook Error: The products of photosynthetic fixation of CO_2 in plants, *by Juli G. Peretó and Mercé Pamblanco* 3
Discussion Forum: A systematic approach to describing and analysing metabolic control systems, *by B. Crabtree and E. A. Newsholme* 4
Control of metabolism: what do we have to measure?, *by H. Kacser and J. W. Porteous* 5
Alternative Viewpoint: Regulation of eIF-2 activity and peptide chain initiation in animal cells, *by Naba K. Gupta* 15

Letters
The catabolism of valine: clues from recent studies in man, *by Rodney J. Pollitt* 18
Certainties and uncertainties in the catabolism of valine, *by Thomas Bøhmer (Reply from Wolf and Akers)* 19
Bee venom therapy, *by Roger C. Prince and Diane E. Gunson* 19

Reviews
Coordinated regulation of a set of genes by glucose and calcium ionophores in mammalian cells, *by Amy S. Lee* 20
Hydroxyproline-rich glycoproteins of plant cell walls, *by James B. Cooper, Jychian A. Chen, Gerrit-Jan van Holst and Joseph E. Varner* 24
Diphtheria toxin: a novel cytocidal enzyme, *by Walter H. J. Ward* 28
A new role for phospholipase A_2: protection of membranes from lipid peroxidation damage, *by Frederick J. G. van Kuijk, Alex Sevanian, Garry J. Handelman and Edward A. Dratz* 31

Book Reviews
Silicon Biochemistry (Ciba Foundation Symposium 121) (edited by David Evered and Maeve O'Connor), *by Howard H. Weetall* 34
A History of Embryology (8th Symposium of the British Society for Developmental Biology) (edited by T. J. Horder, J. A. Witkowski and C. C. Wylie), *by Igor B. Dawid* 34
Molecular Cell Biology (by James Darnell, Harvey Lodish and David Baltimore), *by Gareth Jones* 35
Nitrogen Fixation in Plants (by R. O. D. Dixon and C. T. Wheeler), *by B. E. Smith* 36

Books in Brief
Selected Topics in the History of Biochemistry, Personal Recollections II (Comprehensive Biochemistry Vol. 36) (edited by Giorgio Semenza), Cell and Molecular Biology of the Cytoskeleton (edited by Jerry W. Shay), *by C. H. O'Neill* 36

Microfile
Interactive analysis of protein structure using a microcomputer spreadsheet, *by Larry E. Vickery* 37

Reflections on Biochemistry
Photosynthetic CO_2 assimilation by chloroplasts: assertion, refutation, discovery, *by Daniel I. Arnon* 39

FEBRUARY

Meeting Report
Focus on intermediate filaments, *by Robert D. B. Fraser, Peter M. Steinert and Alasdair C. Steven* 43

***see Errata**

Features
Order and chaos in biochemistry, *by Benno Hess and Mario Markus* 45
Emerging Technique: Patch-clamp studies on higher plants cells: a perspective, *by R. Hedrich, J. I. Schroeder and J. M. Fernandez* 49
Open Question: Proteolytic activation of protein kinase C: a physiological reaction?, *by Andrew W. Murray, Agnes Fournier and Stephen J. Hardy* 53

Letters
Initiation complexes – reply to Gupta, *by Michael Clemens, Jenny Pain and Christopher Proud* 55
Role for rhodanese in Fe–S formation is doubtful, *by Warren Sandberg, Mary C. Graves and Jesse C. Rabinowitz* 56
(*Reply from Cerletti*) 57
Strength and weakness of posters, *by Santiago Grisolía, Giampietro Ramponi and Hubert G. Britton* 57

Reviews
Primary events in olfactory reception, *by Robert R. H. Anholt* 58
The molecular basis of odor recognition, *by Doron Lancet and Umberto Pace* 63
Chloroplast promoters, *by Linda Hanley-Bowdoin and Nam-Hai Chua* 67
Multiple mechanisms of neutralization of animal viruses, *by Nigel J. Dimmock* 70
Polyphosphoinositide phosphodiesterase: regulation by a novel guanine nucleotide binding protein, G_p, *by Shamshad Cockcroft* 75

Reflections on Biochemistry
Eclectic Biochemistry, *by N. W. Pirie* 79

Book Reviews
Genetic Engineering Vol. 5 (edited by Peter W. J. Rigby), *by Kari Alitalo* 81
Penicillin: Meeting the Challenge (by Gladys L. Hobby), *by J. W. Bennett* 82

Books Received 83

MARCH

Journal Club
Gelsolin and p36 share a similar domain, *by Robert D. Burgoyne* 85
Superoxide production by neutrophils, *by Roger C. Prince and Diane E. Gunson* 86

Features
Textbook Error: Does citrate transport supply both acetyl groups and NADPH for cytoplasmic fatty acid synthesis?, *by Thomas E. Conover* 88
Alternative Viewpoint: Evolutionary paradoxes and natural non-selection, *by William Bains* 90
Open Question: Involvement of nucleocapsids in reverse transcription: a general phenomenon?, *by Johannes Fuetterer and Thomas Hohn* 92
Emerging Technique: ENDOR spectroscopy, *by Wolfgang Lubitz and Gerald T. Babcock* 96

Letters
What about the plants?, *by Colin A. Wraight and John McP. Cheeseman* 101
Eukaryotic protein synthesis, *by Naba K. Gupta* 101

Reviews
Calcium activated neutral protease: domain structure and activity regulation, *by K. Suzuki* 103
The compactness of cellular plasmas: in particular, chromatin compactness in relation to function, *by E. Kellenberger* 105
DNA bending and nucleosome positioning, *by A. A. Travers* 108
The role of acetone in the conversion of fat to carbohydrate, *by Bernard R. Landau and Henri Brunengraber* 113

Reflections on Biochemistry
Transamination: its discovery, biological and chemical aspects (1937–1987), *by Yu. M. Torchinsky* 115

Book Reviews
Cytochrome P-450: Structure, Mechanism, and Biochemistry (edited by Paul R. Ortiz de Montellano), *by Shigeki Takemori* 118
Accuracy in Molecular Processes: Its Control and Relevance to Living Systems (edited by T. B. L. Kirkwood, R. F. Rosenberger and D. J. Galas), *by Suresh I. S. Rattan* 119
The Biotechnological Challenge (by S. Jacobsson, A. Jamison and H. Rothman), *by B. S. Hartley* 119
Calcium and the Cell (Ciba Foundation Symposium 122) (edited by David Evered and Julie Whelan), *by Michael J. Geisow* 120

Grapevine 121

APRIL

Journal Club

Rethinking the structure of the photosystem two reaction centre, *by J. Barber* 123
Cytochrome *c* springs a surprise, *by S. J. Ferguson* 124

Features

Strategies for efficiency and accuracy in gene expression. Part 1. The major codon preference: a growth optimization strategy, *by C. G. Kurland* 126
Talking Point: Cellular euthanasia mediated by a nuclear enzyme: a central role for nuclear ADP-ribosylation in cellular metabolism, *by Jozsef C. Gaal, Kevin R. Smith and Colin K. Pearson* 129
Open Question: Is there a new biosynthetic pathway for lung surfactant phosphatidylcholine?, *by J. P. Infante and V. A. Huszagh* 131
Emerging Techniques: 2D-NOESY of DNA: as easy as A, B, Z, *by Jack S. Cohen* 133

Obituaries

Fritz Lipmann (1899–1986): an appreciation, *by Robert Roskoski, Jr* 136
Steve Prentis (1951–1987), *by T. Hunt and J. Hall* 138

Letters

The case of the phantom journal, *by Sandy Grimwade and Helen Atkins* 139
Inositol trisphosphate and muscle: caution is a must, *by Pompeo Volpe, Francesco Di Virigilio and Tullio Pozan* 139
(*Reply from Ochs*) 140
Gel Electrophoresis of ribonucleoproteins, *by Peter B. Moore* 140

Reviews

Mechanistic aspects of the DNA strand exchange activity of *E. coli* recA protein, *by Stephen C. Kowalczykowski* 141
Ion motive ATPases. Part I. Ubiquity, properties and significance to cell function, *by Peter L. Pedersen and Ernesto Carafoli* 146
How do diatoms make silicon biominerals?, *by Dale H. Robinson and Cornelius W. Sullivan* 151
The unusual substrate specificity of eukaryotic protein carboxyl methyltransferases, *by Dana W. Aswad and Brett A. Johnson* 155
The association of polypeptide hormones and growth factors with the nuclei of target cells, *by Susan Jo Burwen and Albert L. Jones* 159

Book Reviews

Ionic Channels in Cells and Model Systems (edited by Ramon Latorre), *by P. E. R. Tatham* 163
Antigenic Variation in Infectious Diseases (edited by T. H. Birbeck and C. W. Penn), *by Marc H. V. Van Regenmortel* 164

Books in Brief

Gnomic: A Dictionary of Genetic Codes (by E. N. Trifonov and V. Brendel); The Role of Membranes in Cell Growth and Differentiation (Current Topics in Membranes and Transport Vol. 27) (edited by Lazaro J. Mandel and Dale J. Benos) 165

Books Received 165

MAY

Journal Club

Ion channels controlled by guanine nucleotide regulatory proteins, *by Miles D. Houslay* 167

Features

Strategies for efficiency and accuracy in gene expression. Part 2. Growth optimized ribosomes, *by C. G. Kurland* 169
Open Question: Intramolecular disulfide bridges: avenues to receptor activation?*, *by Craig C. Malbon, Shaji T. George and Cary P. Moxam* 172
Talking Point: Structural elements for protein–phospholipid interactions may be shared in protein kinase C and phospholipases A_2, *by John M. Maraganore* 176
Textbook Error: Tormented ghosts and disoriented vesicles, *by Kenneth P. Wheeler* 177

Letters

pH Balance: responses to Halperin *et al.* (review p. 198), *by Dieter Haussinger and Daniel E. Atkinson and Edmund Bourke* 179
(*Reply from Halperin* et al.)
Diphtheria toxin membrane translocation: an open question, *by R. Bisson and C. Montecucco* 181
(*Reply from Ward*)

Reviews
Phosphoenolpyruvate transport in the anion transport system of human erythrocyte membranes, *by Naotaka Hamasaki and Youichi Kawano* 183
Ion motive ATPases. Part II. Energy, coupling and work output, *by Peter L. Pedersen and Ernesto Carafoli* 186
Loops, bulges, turns and hairpins in proteins, *by E. James Milner-White and Ron Poet* 189
The cystatins: a new class of peptidase inhibitors, *by Alan J. Barrett* 193
Disposal of the daily acid load: an integrated function of the liver, lungs and kidneys, *by M. L. Halperin, R. L. Jungas, S. Cheema-Dhadli and J. T. Brosnan* 197

Reflections on Biochemistry
Morphogenetic gradients – past and present, *by J. M. W. Slack* 200

Book Reviews
New Insights into Cell and Membrane Transport Processes (edited by George Poste and Stanley T. Crooke), *by H. Murer* 204
False Prophets: Fraud and Error in Science and Medicine (by Alexander Kohn)*, *by John R. Sabine* 205
Current Communications in Molecular Biology: Translational Control (edited by Michael B. Matthews), *by Brian Safer* 205
Living Together: The Biology of Animal Parasitism, *by Frank Ashall* 206

JUNE

Journal Club
Life at the end of the ribosome tunnel, *by Henryk Eisenberg* 207
Phosphorylation of the muscarinic receptor, *by Robert D. Burgoyne* 208

Features
Strategies for efficiency and accuracy in gene expression. Part 3. Drug dependence: growth at the edge *by C. G. Kurland* 210
Open Question: The G protein connection: is it in the membrane or the cytoplasm?, *by Marc Chabre* 213

Letters
Regulation of eIF-2 activity and peptide chain initiation in animal cells, *by K. L. Manchester* 215
(*Reply from Gupta*) 216

Discussion Forum
Is cell metabolism controlled by a 'molecular democracy' or by a 'supramolecular socialism'?, *by G. Rickey Welch and Tamás Keleti* 216
A sensitivity issue, *by David A. Fell* 217
Bridging the gap, *by Enrique I. Canela and Rafael Franco* 218
Control of metabolism: where is the theory?, *by M. A. Savageau* 219
Control in perspective, *by Eberhard O. Voit* 221
Discovering another view of control analysis, *by Albert Sorribas* 221
Reply to Savageau, *by H. Kacser and J. W. Porteous* 222
Reply to Welch and Keleti, *by H. Kacser and J. W. Porteous* 223
Reply from Crabtree and Newsholme, *by B. Crabtree and E. A. Newsholme* 224

Reviews
Switches, thresholds and ultrasensitivity, *by Daniel E. Koshland, Jr* 225
The assembly of blood clotting complexes on membranes, *by Kenneth G. Mann* 229
Molecular architecture of chloroplast coupling factor 1, *by Richard E. McCarty and Gordon G. Hammes* 234
Antigenic cross-reactivity between proteins and peptides: new insights and applications, *by M. H. V. Van Regenmortel* 237
The respiratory burst oxidase, *by Bernard M. Babior* 241

Reflections on Biochemistry
Reminiscences about nucleic acid cytochemistry and biochemistry, *by Jean Brachet* 244

Book Review
Determinative Mechanisms in Early Development (Supplement to Journal of Embryology and Experimental Morphology Vol. 97) (edited by C. C. Wylie), *by Iain W. Mattag* 247

Grapevine 248

JULY

Journal Club

The nature of positional information, *by Panagiotis A. Tsonis* 249

Features

The two redox potentials for oxygen reduction to superoxide, *by Paul M. Wood* 250

Garlic: molecular basis of the putative 'vampire-repellant' action and other matters related to heart and blood, *by Mahendra Kumar Jain and Rafael Apitz-Castro* 252

Open Question: A new puzzle in selenoprotein biosynthesis: selenocysteine seems to be encoded by the 'stop' codon, UGA, *by Ian Chambers and Paul R. Harrison* 255

Talking Point: Gramicidin A: a molecule on the move, *by B. de Kruijff and J. A. Killian* 256

Letters

Plant growth substances and development, *by A. J. Trewavas* 258

The forgotten molecule of life, *by J. S. Clegg* 258

Prospectus of a protein professor, *by V. S. Ananthanarayanan* 258

Reviews

Structure and function of DNA photolyases, *by Gwendolyn B. Sancar and Aziz Sancar* 259

The aerobic respiratory chain of *Escherichia coli*, *by Yasuhiro Anraku and Robert B. Gennis* 262

Biochemistry of the neurotoxic action of MPTP: or how a faulty batch of designer drug led to parkinsonism in drug abusers, *by Thomas P. Singer, Anthony J. Trevor and Neal Castagnoli, Jr* 266

Hormone genes and crown gall disease, *by Elmar W. Weiler and Joachim Schröder* 271

On interpreting the inhibition of and catalysis by dihydrofolate reductase, *by Kazunari Taira, Carol A. Fierke, Jin-Tann Chen, Kenneth A. Johnson and Stephen J. Benkovic* 275

Microfile

Sequence alignment by word processor, *by D. Ross Boswell* 279

Book Reviews

The Biochemistry and Physiology of Plant Disease (by Robert N. Goodman, Zoltán Király and K. R. Wood), *by Dale R. Walters* 281

The Cytoskeleton: Cell Function and Organization (edited by C. W. Lloyd, J. S. Hyams and R. W. Warn), *by Mary Osborn* 281

Books in Brief

Experiments in Molecular Biology (edited by Robert J. Slater); Methods of Protein Microcharacterization: A Practical Handbook (edited by John E. Shively); Basic Methods in Molecular Biology (by L. G. David, M. D. Dibner and J. F. Battey) 282

AUGUST

Biophysics Issue

Par ma foi! Il y a plus de quarante ans que je fais de la biophysique sans que j'en susse rien, *by Henryk Eisenberg* 283

Preparation and manipulation of large DNA molecules: advances and applications, *by Cassandra L. Smith and Charles R. Cantor* 284

DNA polymerase I: from crystal structure to function via genetics, *by Catherine M. Joyce and Thomas A. Steitz* 288

Poising chromatin for transcription, *by David S. Gross and William T. Garrard* 293

Chemical 'snapshots' of DNA: using the hydroxyl radical to study the structure of DNA and DNA–protein complexes, *by Thomas D. Tullius* 297

The hydrogen bond in molecular recognition, *by Alan R. Fersht* 301

Design principles in the construction of biologically active peptides, *by Emil Thomas Kaiser* 305

Protein folding for pleasure and for profit*, *by Roger Pain* 309

Common cold viruses, *by Michael G. Rossmann, Edward Arnold, James P. Griffith, Greg Kamer, Ming Luo, Thomas J. Smith, Gerrit Vriend, Roland R. Rueckert, Barbara Sherry, Mark A. McKinlay, Guy Diana and Michael Otto* 313

Molecules for strength and shape: our fibre-reinforced composite bodies, *by J. E. Scott* 318

Photosynthetic reaction centres: a common link, *by J. Barber* 321

Using magnetic orientation to study structure and assembly, *by Jim Torbet* 327

SEPTEMBER

Journal Club

High resolution studies of *E. coli* aspartate transcarbamoylase come of age, *by Norma Allewell* 331

Receptor-activation of phospholipase A_2 in cellular signalling, *by Robert D. Burgoyne, Timothy R. Cheek and Anthony J. O'Sullivan* 332

Lignin degradation, *by Roger C. Prince and Edward I. Stiefel* 334

Features

Talking Point: Common genes for mitochondrial and cytoplasmic proteins, *by Andrei P. Surguchov* 335

Open Question: Osmotic regulation of gene expression: ionic strength as an intracellular signal?, *by Christopher F. Higgins, John Cairney, Douglas A. Stirling, Lesley Sutherland and Ian R. Booth* 339

Obituary: A scientific odyssey: an appreciation of Albert Szent-Györgyi, *by H. Bradford* 344

Letters

Order, chaos and noise in biochemical systems, *by D. A. Gilbert* 348

(*Reply from Hess and Markus*) 348

Price's Protein Puzzle, *by N. C. Price* 349

Reviews

Transferrins: insights into structure and function from studies on lactoferrin, *by Edward N. Baker, Sylvia V. Rumball and Bryan F. Anderson* 350

Denitrification: a question of the control and organization of electron and ion transport, *by Stuart J. Ferguson* 354

Regulation of messenger RNA turnover in eukaryotes, *by Rajendra Raghow* 358

Protein tyrosine sulfation, *by Wieland B. Huttner* 361

Biosynthesis of linoleic acid in insects, *by Mertxe de Renobales, Colleen Cripps, David W. Stanley-Samuelson, Russell A. Jurenka and Gary J. Blomquist* 364

Reflections on Biochemistry

The ancestry, birth and adolescence of adenosine triphosphate, *by Fritz Schlenk* 367

OCTOBER

Journal Club

Unravelling the role of ATP in post-translational protein translocation, *by Eduard C. Hurt* 369

Features

Open Question: What is the role of receptor methylation in bacterial chemotaxis?, *by Jeff Stock and Ann Stock* 371

Talking Point: Plasma membrane cholesterol pools, *by Gerrit van Meer* 375

Textbook Error: $FADH_2$ as a 'product' of the citric acid cycle, *by Richard Cammack* 377

Letters

The role of phospholipase A_2 in phospholipid peroxide release, *by A. Wendel* 378

(*Reply from Dratz*)

Book Review Supplement

Cell Fusion (edited by A. E. Sowers), *by C. Kondor-Koch* 379

Molecular Biology of the Gene, 4th edition, Vol. 1 (by James D. Watson, Nancy H. Hopkins, Jeffrey W. Roberts, Joan Argetsinger Steitz and Alan M. Weiner), *by Dean A. Jackson* 380

Proteinase Inhibitors (edited by A. J. Barrett and G. H. Salvesen), *by Takashi Murachi* 381

Introduction to Molecular Embryology, 2nd edition (by Jean Brachet and Henri Alexandre), *by Victor D. Vacquier* 381

New Horizons in Platelet Activating Factor Research (edited by C. M. Winslow and M. L. Lee), *by Timothy J. Rink* 382

Receptor Biochemistry and Methodology. Vol. 6: Perspectives on Receptor Classification (edited by J. W. Black) Vol. 7: Phosphoinositides and Receptor Mechanisms (edited by J. W. Putney), *by J. Espinal* 383

Protein Engineering: Applications in Science, Medicine and Industry (edited by Masayori Inouye and Raghupathy Sarma), *by Antony A. Kossiakoff* 384

Microbial Energy Transduction: Genetics, Structure and Function of Membrane Proteins (edited by D. C. Youvan and F. Daldal), *by J. P. Thornber* 385

Biochemistry of Hospital Nutrition (edited by A. M. J. Woolfson), *by W. J. MacLennan* 386

Iron and Infection (edited by J. J. Bullen and E. Griffiths), *by Elaine Letendre* 387

Laboratory Animals: An Introduction for New Experimenters (edited by A. A. Tuffery), *by R. J. Neale* 387

Books in Brief
Annual Review of Cell Biology Vol. 2 (edited by George Palade, Bruce M. Alberts and James A. Spudich); International Review of Cytology Vol. 102 (edited by G. H. Bourne and K. W. Jeon); Outlines of Biochemistry 5th Edition (by Eric E. Conn, Paul K. Stumpf, George Bruening and Roy H. Doi) 388

Microfile
MicroModeller (by I. Salmon), *by C. G. Morgan* 389

Reviews
Protein structure and intracellular stability, *by Martin Rechsteiner, Scott Rogers and Kevin Rote* 390
Structure and recognition mechanism of *Eco*RI endonuclease, *by John M. Rosenberg, Judith A. McClarin, Christin A. Frederick, Bi-Cheng Wang, John Grable, Herbert W. Boyer and Patricia Greene* 395
Steroid hormone receptors: biochemistry, genetics and molecular biology, *by U. Gehring* 399
Beta-oxidation of unsaturated fatty acids: a revised pathway, *by Horst Schulz and Wolf-H. Kunar* 403
Structure and function of cell-associated proteoglycans, *by Lars-Åke Fransson* 406

Reflections on Biochemistry
Through a glass darkly: the industrial side of early British biochemistry, *by Neil Morgan* 412

NOVEMBER

Journal Club
A target site for translational regulation, *by Ruth M. Starzyk* 415
Tertiary templates and compact units in protein design, *by Norma Allewell* 417

Features
Talking Point: The deletion model for the origin of receptors, *by Sid Topiol* 419
Open Question: Do multiple species of protein kinase C transduce different signals?, *by Yoshitaka Ono and Ushio Kikkawa* 421

Letters
Citrate transport: are the textbooks in error?, *by Jerry W. Young, Earl Shrago and Henry A. Lardy* 423
The hidden counterion for the citrate antiporter, *by George D. Guthrie* 424
Counterion considerations, *by Haldane Coore* 424
(*Reply from Conover*) 425
The Michaelis curve as a rectangular hyperbola*, *by H. B. F. Dixon* 425

Reviews
Antibodies as enzymes, *by Richard A. Lerner and Alfonso Tramontano* 427
Plant-induced expression of *Rhizobium* genes involved in host specificity and early stages of nodulation, *by Lone Rossen, Elaine O. Davies, and Andrew W. B. Johnston* 430
Probing the folding of membrane proteins, *by Yuri A. Ovchinnikov* 434
Blood platelet shape change ABCs*, *by David A. Deranleau* 439
Dolichol metabolism in the rat, *by R. Kennedy Keller* 443

Reflections on Biochemistry
The role of technology in anabolic–androgenic steroid biochemistry, *by Charles D. Kochakian* 446

Book Reviews
Junctional Complexes of Epithelial Cells: Ciba Foundation Symposium 125 (edited by G. Bock and S. Clark), *by Caroline MacDonald* 450
Metabolic Regulation: A Molecular Approach (by B. R. Martin), *by C. J. Masters* 451
An Introduction to Nitrogen Fixation (by J. R. Gallon and A. E. Chaplin), *by Lawrence C. Davis* 451

Books Received 452

Grapevine 453

DECEMBER

Journal Club

Hopanoids: the world's most abundant biomolecules?, *by Roger C. Prince* 455

Features

Open Question: Did vertebrate signal transduction mechanisms originate in eukaryotic microbes?, *by Pim M. W. Janssens* 456

Three-dimensional model of human rhinovirus type 14, *by Christon J. Hurst, William H. Benton and Julia M. Enneking* 460

Letters

The ras protein and the cell membrane, *by Roger Grand* 461

Lipid bilayers and proteins: a fluctuating interaction?, *by I. R. Miller* 461

(*Reply from Chabre*) 462

DNA 'footprinting' and the prebiotic evolution of chromatin, specific binding sites, etc, *by J. E. Scott* 463

Unicellular eukaryotes are not devoid of ADPRT, *by Piet Borst* 463

Reviews

'Zinc fingers': a novel protein motif for nucleic acid recognition, *by Aaron Klug and Daniela Rhodes* 464

How *Chlamydomonas* court their partners, *by A. Musgrave and H. van den Ende* 470

Enzymatic model for receptor activation of GTP-binding regulatory proteins, *by Marianne Wessling-Resnick, Daniel J. Kelleher, Ellen R. Weiss and Gary L. Johnson* 473

Harnessing disulfide bonds using protein engineering, *by Ronald Wetzel* 478

Regulation of the sodium pump: how and why?, *by B. C. Rossier, K. Geering and J. P. Kraehenbuhl* 483

Reflections on Biochemistry

A century of lectin research (1888–1988), *by Nathan Sharon and Halina Lis* 488

Book Reviews

The Secretory and Endocytic Paths (by A. M. Tartakoff), *by Dan Cutler* 492

Modern NMR Spectroscopy: A Guide for Chemists (by Jeremy K. M. Saunders and Brian K. Hunter), *by Horst Kessler* 492

Books Received

ERRATA

Intramolecular disulphide bridges: avenues to receptor activation, *by C. C. Malbon, S. T. George and C. P. Moxam* (May, 172–175) 394

False Prophets: Fraud and Error in Science and Medicine (by Alexander Kohn), *by J. R. Sabine* (May, 205) 394

Protein folding for pleasure and for profit, *by R. Pain* (August, 309–312) 394

The Michaelis curve as a rectangular hyperbola, *by H. B. F. Dixon* (November, 425) 462

Blood platelet shape change ABCs, *by D. A. Deranleau* (November, 439–442) 462
